

## **Trane CleanEffects™**

The standard air cleaners on the market have filters that are very dense. Meaning they try to stop the dust by trapping it in a slightly porous filter. The fewer the pores the more dust it can trap. However, this not only stops the dust and dirt, but it also stops the air from moving as well. In other words, the amount of air that goes through your system is reduced so you may not be as comfortable. Less air is cleaned efficiently. This is called pressure drop. The revolutionary Trane CleanEffects™ air filtration system has the lowest pressure drop with the highest efficiency possible. Our unique patented technology is designed to let air flow freely through the most advanced filtration system available. The result, more of your air is cleaned faster and more effectively than anything else on the market.

Trane CleanEffects™ utilizes patented, breakthrough air cleaning technology to remove up to an astounding 99.98% of airborne allergens from the air that passes through the filter, making it 8 times more effective than even the best HEPA room filters and up to 100 times more effective than a standard 1" filter. What's more, Trane CleanEffects™ has been performance-tested by LMS Technologies and Environmental Health & Engineering, Inc. (EH&E), with the results verified by professors from the Harvard School of Public Health, so you know you're getting an air filtration system like no other.

## **Trane PerfectFit™ Filters**

A Trane PerfectFit™ Filter is an integral part of a Trane home comfort system. And, its easily upgradable, with three filtration options including the higher efficiency Trane CleanEffects™.

One cabinet, three filtration options. If you start out with a pleated or media filter, you can easily upgrade to Trane CleanEffects™. And, regardless of the filter you choose, the filters are easy to access and maintain.

We know the indoor air quality of your home is important to you. And, interestingly enough, the air inside your home is usually more polluted than the air outside. And, that means millions of unwanted airborne particles are being inhaled by you and your family. Particles like pollen, dust, bacteria, tobacco smoke, cooking smoke, and animal hair and dander keep your indoor air from being as clean - and healthy - as it could be. Also, if anyone in your family suffers from asthma or allergies, the quality of the air in your home is even more important.

### **PerfectFit™ 5" Media Filter Features:**

Up to 15 times more effective than a standard throwaway filter

Available in a variety of sizes

Easy to replace

Helps maintain the operating efficiency of your home comfort system

Easily upgraded to a Trane CleanEffects™ with Upgrade Kit for PerfectFit™ Products

Filters 100% of the air that is heated & cooled

**PerfectFit™ 1" Pleated Filter Features:**

Up to 6 times more effective than a standard throwaway filter

Available in a variety of sizes

Easy to replace

Filters 100% of the air that is heated & cooled

Easily upgraded to a Trane CleanEffects™ with Upgrade Kit for PerfectFit™ Products

### **Trane FreshEffects™ Air Cleaners**

Effectively, ventilation is critical for fresher, more comfortable air throughout your home. Bad odors can linger, making indoor air unpleasant and uncomfortable. Trane FreshEffects is an energy-efficient way to improve the quality of the air inside your home.

**Cleaner, healthier indoor air**

Exchanges stale indoor air for an equal amount of fresher outdoor air.

**Increased comfort**

Retains heat and moisture from exchanged air in winter, but pre-conditions and dehumidifies incoming air in summer-so your home is more comfortable year-round.

**Energy efficient**

Transfers energy from the air being exhausted from inside to the air being drawn in from outside, making for a more energy-efficient home.

**Easy to use**

Adjustable control provides automatic ventilation 24/7.

**Durable construction**

Cabinet is powder-coated. All component materials are rigorously tested for long-lasting performance and durability
